Next Review Date: October 2024

1. Aims

Our school aims to....

"teach children the knowledge, skills and confidence that will enable them to lead as full, happy and independent a life as possible. Within the school and community it aims to provide a learning experience that is exciting, challenging and relevant."

The aims of relationship and sex education (RSE) at Glyne Gap School is to enable our pupils to acquire the information, skills and values to have happy and fulfilled relationships, making safe and sensible choices for their wellbeing and sexual health. We aim to create a positive culture around issues of sexuality and relationships.

2. Statutory requirements

As a primary and secondary academy school we must provide relationships education to all pupils as per section 34 of the Children and Social work act 2017. We do not have to follow the National Curriculum but we are expected to offer all pupils a curriculum that is similar to the National Curriculum including requirements to teach science which would include the elements of sex education contained in the science curriculum.

In teaching RSE, we are required by our funding agreements to have regards to guidance issued by the state as outline in section 403 of the Education Act 1996.

At Glyne Gap School we teach RSE as set out in this policy.

3. Policy Development and Curriculum

The development of this policy has been developed in consultation with a parent group, staff and pupils, taking into account the age, needs and feelings of pupils. If pupils ask questions outside the scope of this policy, teachers will respond in an appropriate manner so they are fully informed and don't seek answers online.

All staff were given the opportunity to look at this policy and make recommendations. The policy has been shared with parents/ stakeholders and their views sought. The policy was presented to and discussed with governors and then ratified.

Our curriculum is set out in Appendix 1.

4. Definition

The aim of RSE is to give our pupils the information needed to help themselves to develop positive, healthy relationships of all kinds, how to keep themselves safe within these relationships, including in a digital context. It also supports pupils to develop and nurture healthy relationships as pupils move into adulthood, learning about social and physical aspects of growing up, sex, sexuality and sexual health and moral and emotional

development. Some aspects are taught discretely where appropriate and others taught as part of personal, social, health an economic education (PSHE).

RSE involves a combination of sharing information and exploring issues and values.

RSE is not about the promotion of sexual activity.

5. Delivery of RSE

Delivery of RSE will be at an appropriate level for the age and understanding of pupils.

RSE is taught within the personal, social, health and economic (PSHE) education curriculum. Biological aspects of RSE are taught discretely to pupils when it is appropriate.

In order to develop pupils' understanding and skills around relationships, there is a strong emphasis on RSE, which features throughout the school within both the Tier 1 PSHE and Tier 2 Personal Development curriculum. The Tier 1 element falls under the Friendships, Relationships and Sex Education strand of the Personal Autonomy curriculum, which covers the vital skills involved in building successful relationships with others. For example pupils are taught to respond to others' interactions, greet people, play/work alongside others, understand their own and others' emotions, interact with others appropriately, show consideration of others' feelings, and think about how their behaviour may affect others. They are also taught how to keep themselves safe, for example understanding the term 'private', knowing who it is most appropriate to talk to about different things, and knowing how to keep themselves safe in the community and when online, using social media for example. Tier 1 is delivered through IEP's.

The RSE programme within the Tier 2 curriculum is delivered as part of the 4 themes and is progressive through Key Stages 1-4. The programme is underpinned through 3 skill areas:- permission, decision making and assertion. Pupils' understanding of puberty is covered through the Tier 2 curriculum and delivery of this may be in class groups, with group targets and outcomes or will be organised with pupils grouped by developmental need and gender e.g. if a pupil is developmentally ready in the Juniors there should be a flexibility for them to join the Seniors RSE programme.

As a school, we do not teach 'sex education' as a matter of course to all pupils. Where it is felt that this is appropriate or a pupil needs input around this, a bespoke programme is provided (in consultation with parents) to ensure that pupils have the knowledge they need to keep themselves and others safe (e.g. consent, contraception, safe sex).

Giving a vocabulary and "permission" to talk about these matters can be empowering in enabling pupils to ask the questions and express the feelings they want to, which in turn help staff to respond more appropriately. Using clear unambiguous pictures, models,

videos, symbols etc helps this process and can of course help in teaching about keeping safe e.g. good and bad touching. In this area, self-esteem and assertiveness skills become particularly important for our pupils, whose lives have often been predominantly dependent and lived in a culture of compliance.

It is important to remember that people who have built up trusting relationships with pupils and our young people are best placed to support all aspects of teaching. Staff confidence when teaching RSE is paramount when supporting pupils with the sensitive issues involved. It is good practice that pupils with similar areas of need in terms of their maturity, readiness and similar levels of comprehension is key to the success of teaching this important area of learning, with opportunities for discrete single gender groups.

Relationship education focuses on teaching the fundamental building blocks and characteristics of positive relationships. It also focuses on giving pupils the information they need to help them develop healthy, nurturing relationships of all kinds including:

- Families and people who care for me
- Caring friendships
- Respectful relationships
- Online relationships
- Being safe
- ➤ Intimate and sexual relationships, including sexual health
- Mental wellbeing
- Physical health and fitness
- > Healthy eating
- Drugs, alcohol and tobacco
- ► Heath and prevention
- Basic first aid
- Changing adolescent body

These areas of learning are taught within the context of family life taking care to ensure that there is no stigmatisation of children based on their home circumstances (families can include single parent families, LGBT parents, families headed by grandparents, adoptive parents, foster parents/carers amongst other structures) along with reflecting sensitively that some children may have a different structure of support around them (for example, looked after children or young carers).

6. Roles and responsibilities

The Governing Body

The governing body will approve the RSE policy and hold the head teacher to account for its implementation.

The Head of School

The head of school is responsible for ensuring that RSE is taught consistently across the school, and for managing requests to withdraw pupils from non-statutory components of RSE (see section 8).

Staff

Staff are responsible for:

- Delivering RSE in a sensitive way
- Modelling positive attitudes to RSE
- Monitoring progress
- Responding to the individual needs of the students
- Responding appropriately to students whose parents wish them to be withdrawn from the non-statutory components of RSE

All staff are responsible for teaching RSE. Any staff do not have the right to opt out of teaching RSE. Staff who have concerns about teaching RSE are encouraged to discuss this with the PSHE/ Personal Development co-ordinator or Head of School.

Pupils

Pupils are expected to engage fully in RSE and, when discussing issues related to RSE, treat others with respects and sensitivity.

7. Parents right to withdraw

Parents of primary aged pupils.

Parents do not have the right to withdraw their children from relationships education.

Parents have the right to withdraw their children from the non-statutory components of sex education within RSE.

Requests for withdrawal should be put in writing using the form found in appendix

3 of this policy and addressed to the head teacher.

Alternative work will be given to pupils who are withdrawn from sex education.

Parents of Secondary aged pupils.

Parents have the right to withdraw their children from the non-statutory components of sex education with RSE up to and until 3 terms before the child turns 16. After this point, if the child wishes to receive sex education rather than being withdrawn, the school will arrange this after consultation with the child and their parents.

Requests for withdrawal should be put in writing using the form found in appendix 3 of this policy and addressed to the head teacher.

A copy of withdrawal requests will be placed in the pupils educational record. The head teacher will discuss the request with parents and take appropriate action.

Alternative work will be given to pupils who are withdrawn from sex education.

8. Training

Training will be provided to members of staff who feel unsure about delivering any aspects of the curriculum. Training will be given "in-house" or by other suitably qualified professionals. Visitors from outside the school, such as school nurses or sexual health professionals, may also be invited to provide support and training to staff teaching RSE.

9. Monitoring arrangements

The delivery of RSE is monitored by heads of school/ senior leadership team. Pupil's development in RSE is monitored by class teachers as part of our internal assessment system.

This policy will be reviewed by the PSHE/ Personal Development co-ordinator annually. At every review, any amendments to the policy will be presented to the Governors Teaching and Learning committee for Governor approval.

10. Next steps/ Developments for RSE

Development plan 2023-24

- To ensure that all pupils post 16 continue to receive a broad and balanced PSHE/RSE curriculum.
- Clarification of the 8 protected characteristics and how the PSHE curriculum plans for their coverage throughout the school.
